

**USHFC-2014-Resolution Re: Physician and Practitioner Freedom of Speech
Resolution 4**

**SUPPORTING THE FREEDOM OF SPEECH FOR PHYSICIANS AND
PRACTITIONERS WHEN ADDRESSING AUTISM AS A BIOMEDICAL
DISORDER AMENABLE TO TREATMENT**

2014 U.S. Health Freedom Congress

Hamline University, St. Paul, Minnesota, September 26 and 27, 2014

Submitted by AutismOne

Whereas individuals with the diagnostic label of autism have been shown in literature to suffer from comorbid conditions affecting, but not limited to, the immune and gastrointestinal systems, including, but not limited to, inflammation, diarrhea, constipation, and allergies and sensitivities;

Whereas individuals with the diagnostic label of autism have been declassified from the label of autism when these comorbid conditions have been addressed by credentialed practitioners in fields of alternative and complementary medicine and mainstream medicine;

Therefore, be it resolved that the following Voting Members of the US Health Freedom Congress do affirm and support the position of AutismOne that supports the freedom of speech for both medical doctors and alternative practitioners to speak the truth that autism includes very treatable physiological conditions that can be addressed by dietary, nutritional/supplemental, osteopathic, homeopathic, naturopathic, chiropractic, and other non-pharmaceutical approaches.
